4,983

**AVERAGE PRICE
(USD)**

\$8.79

**AVG POSITIVE
RATIO**

81.30%

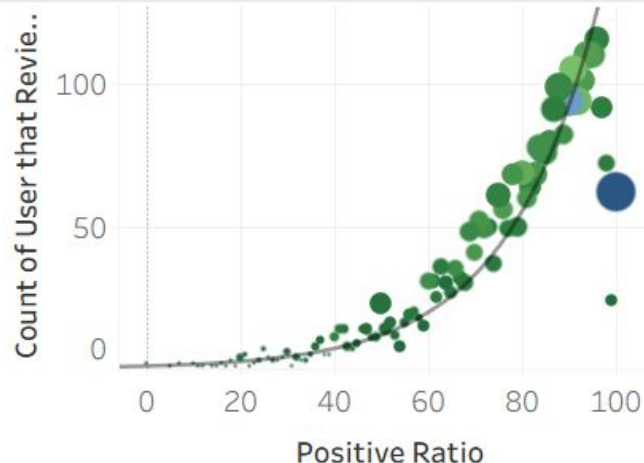

YEAR OF RELEASE

(All)

Release Trends

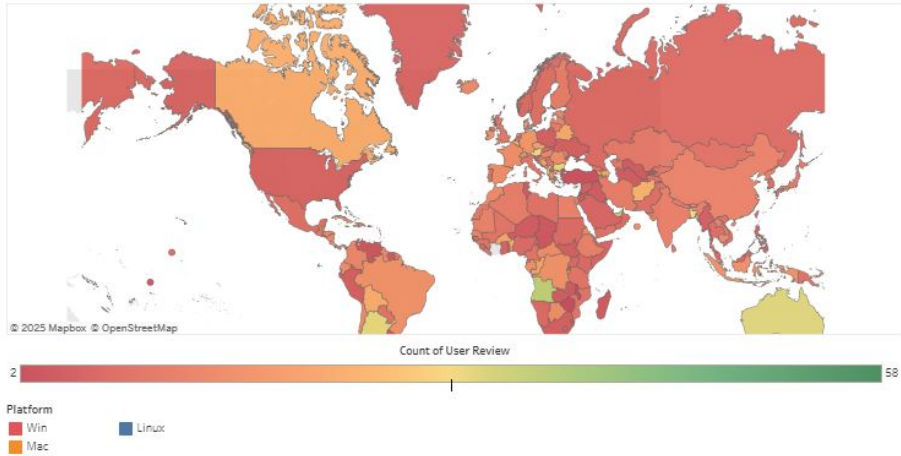

Positive Ratio vs. User Reviews

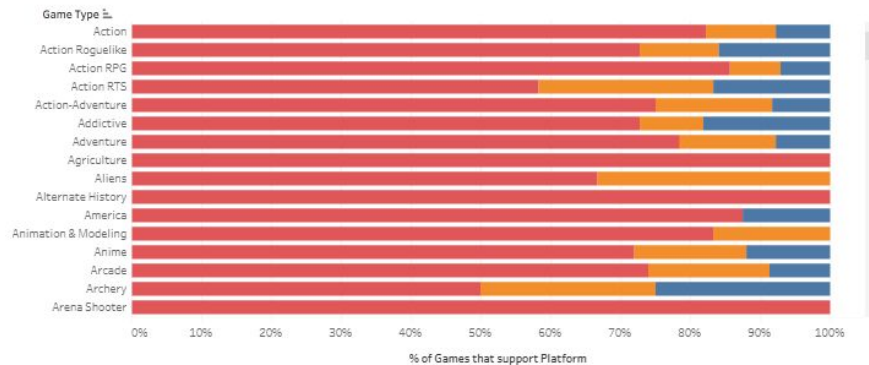

The Dashboard – Part 2

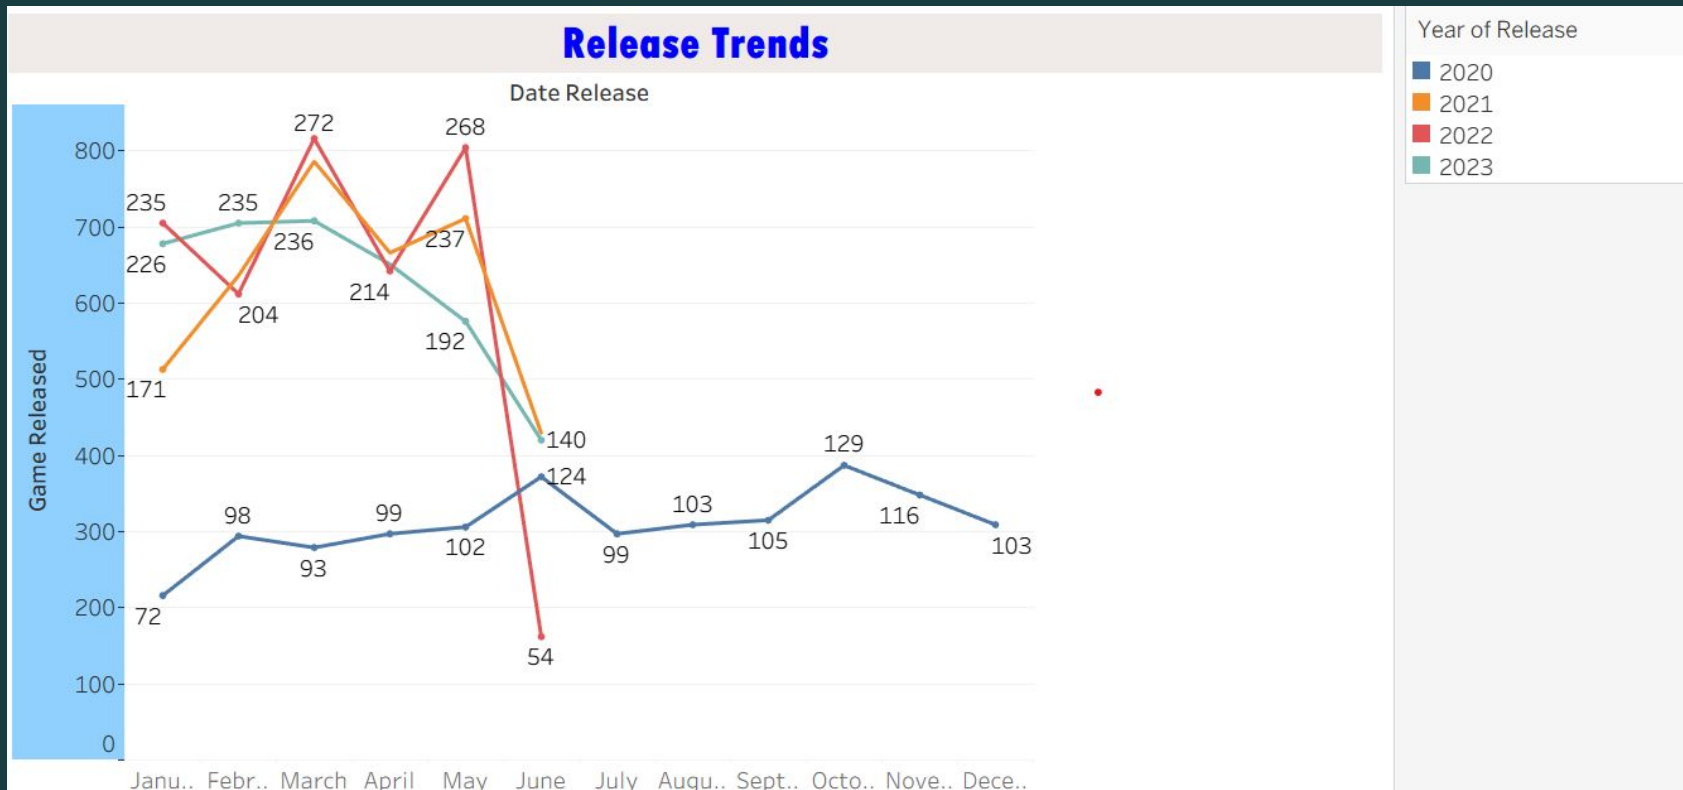

User Count by Country/Region

Platform Availability

Release Trends

Insight:

Game releases peak in March–May each year, then drop sharply mid-year. 2023 shows fewer releases overall compared to 2021–2022.

Rating Distribution

Insight:

Most games are rated Very Positive or Positive, showing generally favorable player feedback. Negative ratings are rare, with very few titles receiving "Negative" or "Very Negative" scores.

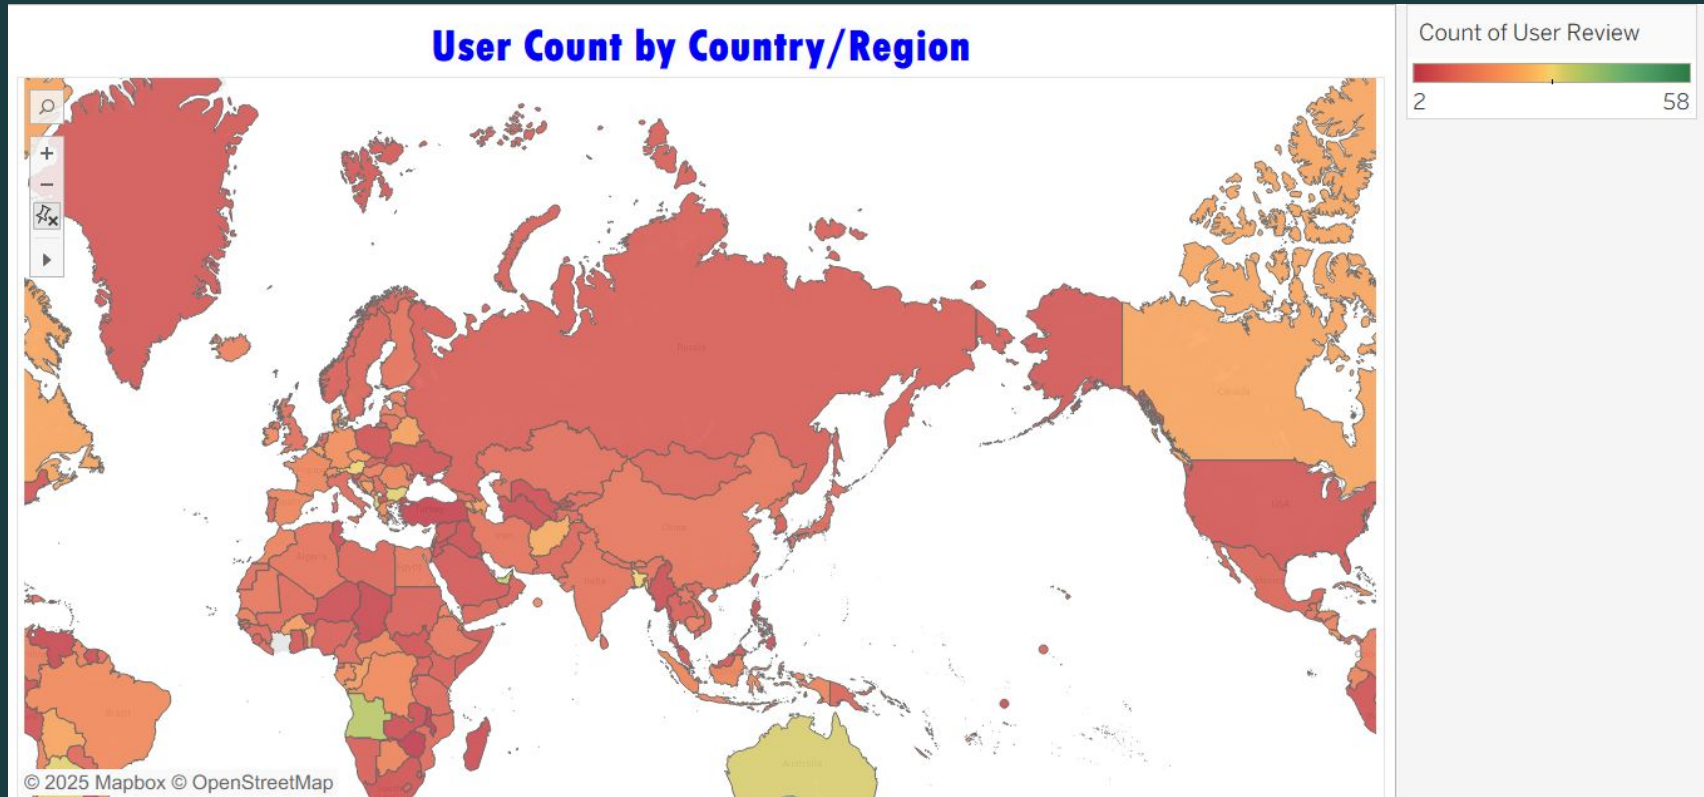

Positive Ratio vs. User Reviews

Insight:

Games with higher positive ratios tend to receive more user reviews, showing a strong correlation between satisfaction and engagement. A few high-priced games with deep discounts also attract significant attention despite moderate review counts.

User Count Review by Country/Region

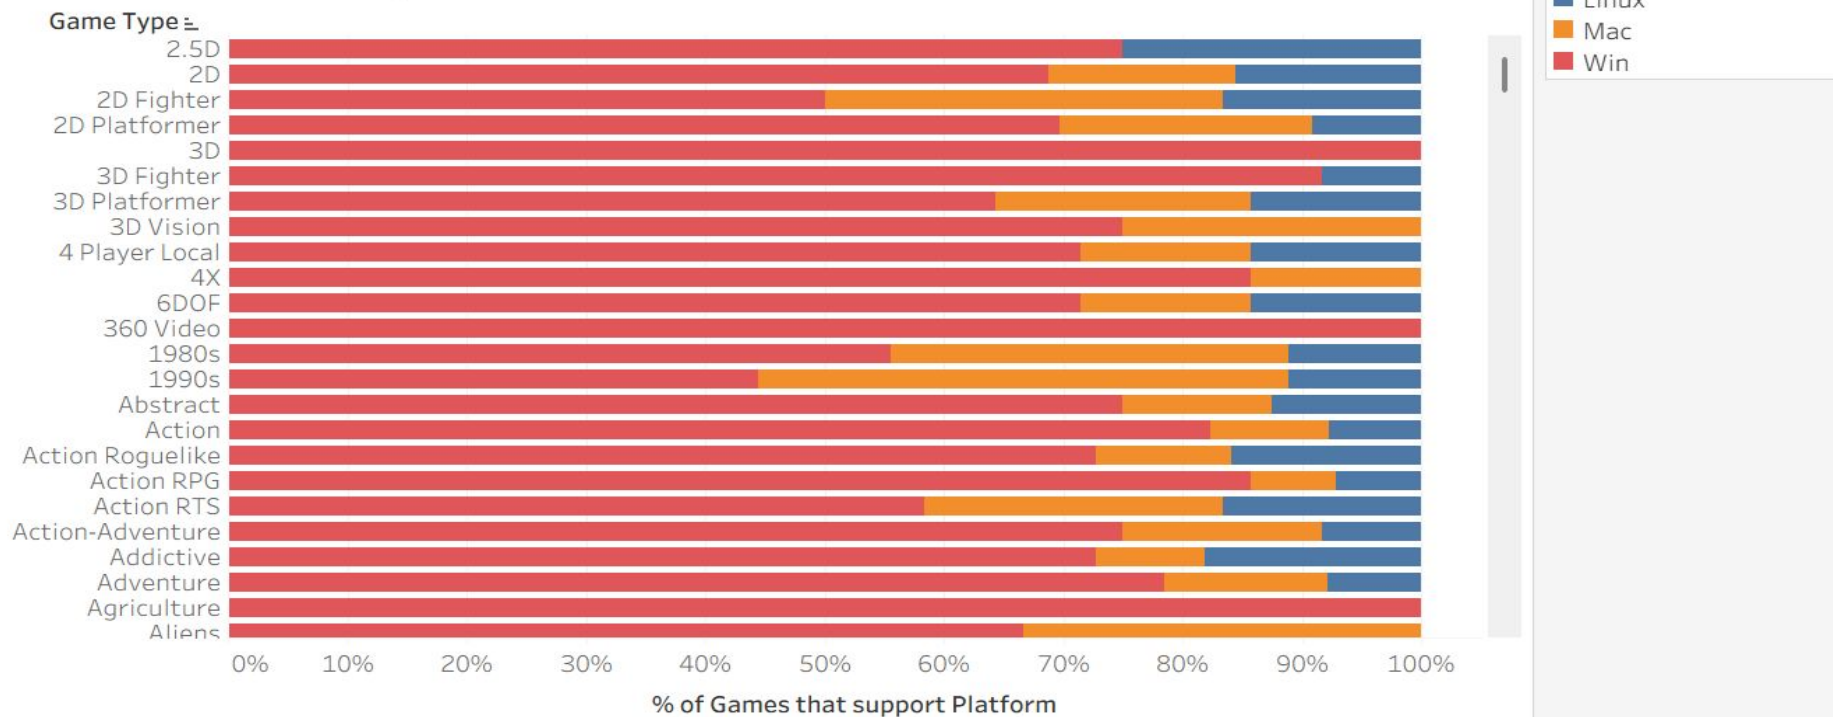

Insight:

User review activity is globally distributed, but only a few countries show high engagement (up to 58 reviews). Most countries have low review counts, indicating that active reviewers are concentrated in specific regions.

Platform Availability

Platform Availability

Insight : Windows dominates platform support, while Mac and Linux have significantly smaller market shares. A lot of game type even doesn't support Linux.

Recommendations

❖ Promote High-Rating, Low-Review Games

- Use Steam front-page promotions or bundle offers to give exposure to hidden gems.

❖ Target Regional Preferences

- Localize marketing campaigns to match regional trends in ratings and game types.

❖ Leverage Platform Expansion

- Porting to Mac/Linux could capture under-served but loyal segments.

❖ Capitalize on Strong Ratings

- Games in “Very Positive” range can support higher pricing and DLC expansions.

❖ User Engagement Boost

- Encourage reviews from underrepresented regions to balance community sentiment visibility.

A full-page background image of a beach at sunset. The sky is a deep orange and red. In the foreground, a sandy beach curves along the water. Several people are visible: some standing on the shore, one person is wading in the shallow water, and another is swimming further out. Two small boats with canopies are anchored near the shore. In the distance, a range of mountains is silhouetted against the bright horizon.
